

Inspire

Perennial ryegrass, a Scotts® exclusive, is one of the first releases from the next generation of ryegrasses. The next generation has taken performance and color to the higher standard. In addition, to outstanding performance and deep, dark green color, Inspire provides a low growth habit, and improved disease resistance.

GRASSES. FOR THE FUTURE

The Inspire Advantage

- One of the highest rated varieties in the most recent NTEP results. Noted as R8000 in trials.
- A new release from the “next generation” in the development of perennial ryegrasses.
- Exceptionally deep, dark green color.
- High endophyte levels provide excellent tolerance to surface feeding insects.
- Very good overall disease resistance.
- Outstanding component in turf mixtures and blends.
- Dwarf growth habit results in reduced clipping yields throughout the growing season.
- Very fine leaf texture.
